

Tired of paying too much for phone service?

Get **iSIP** and start saving **NOW!**

What is iSIP and VOIP?

iSIP is a complete phone line service delivered over your Internet or IP data line, which your business can utilize with your own SIP (Session Initiation Protocol) enabled VoIP (Voice over IP) equipment. Whether you have a traditional PBX or iPBX we are ready to implement the savings of iSIP! ISI certified resellers can provide you any needed hardware and/or installation. Sign up for iSIP Business Service and start saving today!

Voice Tuned Back-bone Network

The iSIP service does not use the internet backbone to process your voice calls, our back-bone network carries only IP voice traffic. Our customers calls don't get bogged down by heavy file transfers, and big downloads on our back-bone, our network is tuned to transmit voice traffic.

IP/PBX or IP phone Compatible

iSIP VOIP Service will accommodate any small/medium business environment with a direct replacement of traditional telephone service with less expensive, more flexible VOIP service. We will do all of the necessary implementation, and integration to your existing or new offices in a non-disruptive, seamless fashion. All you business needs is a data connection to the internet.

Works with any VoIP or Legacy PBX

iSIP VOIP fits into your existing PBX by using a Gateway provided by ISI Communications. We use only the top brands in the industry, providing the highest quality VOIP transmission to connect to your existing voice switch. Whether you have an ISDN PRI, or traditional POTS (Plain Old Telephone Service) lines, your business can start realizing the savings provided by iSIP VOIP.
